

It sticks to the road, but nothing sticks to it.

Your hands should be wrapped around the steering wheel, not around a squeegee. The BMW Self-Cleaning Car means that you'll never have to spend another weekend toiling over what type of soap or car wax to purchase, ever again. Microscopic blowholes emit a constant stream of

heated air, removing dust, bugs, water and everything else from the entire surface area of the vehicle, ultimately leaving you with more time to simply enjoy driving your BMW. For more information, visit [www.bmw.ca/blowholes](http://www.bmw.ca/blowholes)
